VT W310U DECT wireless headsets

Powerful Combination for Hybrid Work

The VT W310U DECT headset with 300U dongle offers flexibility, superior sound quality and user-friendly features ideal for hybrid work. The VT W310U headset can be used standalone, without a traditional DECT base. With flexibility and convenience, it is the perfect tool for hybrid work. With a range of up to 150 m, the headset ensures freedom of movement without compromising call quality. DSP (Digital Signal Processing) reduces noise and cancels echo, significantly improving voice quality for both the user and the listener. This ensures clear, uninterrupted communication, making every conversation more efficient and professional.

Wide Compatibility

The headset integrates seamlessly with major UC platforms. Supports remote call management for MS Teams and Skype for Business via the 300U dongle. With UC Bridge, it can be used with 3CX, Avaya Workplace, Counterpath Bria, etc...

A Voice Technologist

- ✓ Comfortable with over-head wearing style
- ✓ Wideband audio for exceptional sound quality
- ✓ Up to 8 hours of talk time, at least 100 hours standby time
- ✓ Battery Full charge in less than 3 hours
- ✓ Volume and mute controls
